Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System), which provides direct, on-line access to Patent and Tradesmark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collec patents from either microfilm or paper collections are generallcontemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Service of Process and Testimony of Employees of the Patent and Trademark Office and Production of Documents in Legal Proceedings

The Patent and Trademark Office (PTO) is adding Parts 15 and 15a to Title 37 of the Code of Federal Regulations. Part 15 concerns service of process on the Commissioner, the Patent and Trademark Office, and employees of the Patent and Trademark Office in their official capacity. Part 15a concerns the testimony of PTO employees regarding official matters and the production of official documents in legal proceedings. Parts 15 and 15a were effective upon publication in the Federal Register. 54 FR 3976-8 (Jan. 26, 1989).

In addition, §§1701 and 1701.01 of the Manual of Patent Examining Procedure and §§1801 and 1801.01 of the Trademark Manual of Examining Procedure are amended, as indicated below, effective immediately.

Parts 15 and 15a, §§1701 and 1701.01 of the Manual of Patent Examining Procedure and §§1801 and 1801.01 of the Trademark Manual of Examining Procedure are published in this notice as a convenience to the public. In addition to these materials, the Patent and Trademark Office alerts the public to its position with respect to *Standard Packaging Corp.* v. *Curwood, Inc.*, 365 F. Supp. 134, 180 USPQ 234 (N.D. Ill. 1973). In the past, parties have attempted, based on *Standard Packaging*, to obtain answers to questions which the Patent and Trademark Office has regarded to be improper. While the Patent and Trademark Office believes *Standard Packaging* accurately states the law, the Office believes that the court misapplied the law to the precise questions in issue. Accordingly, the Office agrees with the Federal Circuit's observation in *Western Electric Co.* v. *Piezo Technology, Inc.* v. *Quigg*, 860 F.2d 428, 432, 8 USPQ 2d 1853, 1857 (Fed. Cir. 1988), that there is considerable doubt whether *Standard Packaging* was correctly decided. The Patent and Trademark Office will not permit examiners to answer questions similar to those which the *Standard Packaging* court found acceptable.

[Docket No. 9106-9006]

Service of Process and Testimony of Employees of the Patent and Trademark Office and Production of Documents in Legal Proceedings

Agency: Patent and Trademark Office.
Action: Final rule.
Summary: The Patent and Trademark Office is adding 37 CFR Parts 15 and 15a to supplement 15 CFR Parts 15 and 15a. These new parts prescribe policies and procedures to be followed with respect to service of process on the Patent and Trademark Office, the Commissioner of Patents and Trademarks, and employees of the Office, the testimony of Office employees regarding official matters, and the production of official documents in legal proceedings. These regulations serve as a statement of Office policy and provide comprehensive guidelines for the Office and its employees, outside agencies, and other persons regarding the appropriate procedures for service of process, testimony, and production of documents.
Effective date: Jan. 26, 1989.
For Further Information Contact: Associate Solicitor John W. Dewhirst by mail at Box 8, U.S. Patent and Trademark Office, Washington, D.C. 20231 and by phone at (703) 557-4035.
Supplementary Information: These regulations are designed to supplement, and be construed consistent with, 15 CFR Parts 15 and 15a. The regulations in Part 15a state the views of the Office with respect to the permissible scope of testimony which may be given by Office employees in connection with their performance of quasi-judicial patent and trademark matters. These Office views are consistent with *United States* v. *Morgan*, 313 U.S . 409, 422 (1941); *Western Electric Co., Inc.* v. *Piezo Technology, Inc.* v. *Quigg*, No. 88-1216, 860 F.2d 428, 8 USPQ 2d 1853 (Fed. Cir. Nov. 1, 1988); *In re Mayewsky*, 162 USPQ 86, 89 (E.D. Va. 1969), and *Shaffer Tool Works* v. *Joy Mfg. Co.*, 167 USPQ 170 (S.D. Tex. 1970).

Because these regulations concern agency management and personnel, they are not rules or regulations within the meaning of section 1(a) of Executive Order 12291, and they are not subject to the requirements of that Order. Accordingly, no preliminary or final regulatory impact analysis has to be or will be prepared.

These regulations, relating to agency management and personnel, are exempt from all requirements of section 553 of the Administrative Procedure Act [5 USC 553] including a delayed effective date and therefore will be effective immediately upon publication in the Federal Register.

Because a notice of proposed rule making and an opportunity for public comments are not required to be given for these regulations by section 553 of the APA, or by any other law, no regulatory flexibility analysis has to be or will be prepared for purposes of the Regulatory Flexibility Act [5 U.S.C. 603(a) and 604(a)].

This final rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

This rule does not contain collections of information for purposes of the Paperwork Reduction Act.

List of subjects in 37 CFR Parts 15 and 15a: Attorneys, Administrative practice and procedure, Courts, Government employees.

For the reasons set forth in the preamble, 37 CFR is amended as follows:

1. Part 15 is added to read as follows:

Part 15
Service of Process

Sec.
15.1 Scope and purpose
15.2 Definitions
15.3 Acceptance of service of process
Authority: 5 U.S.C. 301; 15 U.S.C. 1501, 1512, 1513, 1515, and 1518; Reorganization Plan No. 5 of 1950; 44 U.S.C . 3101; 15 CFR 15.2(a).

§15.1 Scope and Purpose.

(a) This part supplements 15 CFR Part 15 and sets forth the procedures to be followed when a summons or complaint is served on the Office or the Commissioner or an employee of the Office in his or her official capacity. This part is to be construed consistent with 15 CFR Part 15.

(b) This part is intended to ensure the orderly execution of the affairs of the Office and not to impede any legal proceeding.

(c) This part does not apply to subpoenas. The procedures to be followed with respect to subpoenas are set out in Part 15a of this Title.

(d) This part does not apply to service of process made on an Office employee personally on matters not related to official business of the Office or to the official responsibilities of the Office employee.

§15.2 Definitions.

For the purpose of this part:

(a) "Commissioner" means Assistant Secretary and Commissioner of Patents and Trademarks.

(b) "Legal proceeding" means a proceeding before a tribunal constituted by law, including a court, an administrative body or commission, or an administrative law judge or hearing officer.

(c) "Office" means Patent and Trademark Office.

(d) "Office employee" means any officer or employee of the Office.

(e) "Official business" means the authorized business of the Office.

§15.3 Acceptance of service of process

(a) Any summons or complaint to be served in person or by registered or certified mail or as otherwise authorized by law on the Office or the Commissioner or an Office employee in his or her official capacity, shall be served on the Solicitor or an Office employee designated by the Solicitor.

(b) Any summons or complaint to be served by mail may be addressed to Solicitor, P.O. Box 15667, Arlington, Va. 22215. Any summons or complaint to be served by hand may be delivered to the Office of the Solicitor.

(c) Any Office employee served with a summons or complaint shall immediately notify and deliver the summons or complaint to the Office of the Solicitor.

(d) Any Office employee receiving a summons or complaint shall note on the summons or complaint the date, hour, and place of service and whether service was by personal delivery or by mail.

(e) When a legal proceeding is brought to hold an Office employee personally liable in connection with an action taken in the conduct of official business, rather than liable in an official capacity, the Office employee by law is to be served personally with process. Service of process in this case is inadequate when made upon the Solicitor or the Solicitor's designee. Any Office employee sued personally for an action taken in the conduct of official business shall immediately notify and deliver a copy of the summons or complaint to the Office of the Solicitor.

(f) An Office employee sued personally in connection with official business may be represented by the Department of Justice at its discretion. See 28 CFR 50.15 and 50.16 (1987).

(g) The Solicitor or Office employee designated by the Solicitor, when accepting service of process for an Office employee in an official capacity, shall endorse on the Marshal's or server's return of service form or receipt for registered or certified mail the following statement: "Service accepted in official capacity only." The statement may be placed on the form or receipt with a rubber stamp.

(h) Upon acceptance of service or receiving notification of service, as provided in this section, the Solicitor shall take appropriate steps to protect the rights of the Commissioner or Office employee involved.

All inquiries involving a demand or potential demand on an Office employee shall be referred to the Solicitor.
(b) A certified copy of a document, not otherwise available under Chapter I of this Title, will be provided for use in a legal proceeding upon written request and payment of applicable fees required by law.
(c)(1) *Request for testimony or document.* A request for testimony of an Office employee or document shall be mailed or hand-delivered to the Office of the Solicitor. The mailing address of the Office of the Solicitor is Box 8, Patent and Trademark Office, Washington, D.C. 20231.
(2) *Subpoenas.* A subpoena for testimony by an Office employee or a document shall be served in accordance with the Federal Rules of Civil or Criminal Procedure as appropriate, or applicable state procedure, and a copy of the subpoena shall be sent to the Solicitor.
(3) *Affidavit.* Every request and subpoena shall be accompanied by an affidavit or declaration under 28 U.S.C. 1746 or, if an affidavit or declaration is not feasible, a written statement setting forth the title of the legal proceeding, the forum, the requesting party's interest in the legal proceeding, the reasons for the request or subpoena, a showing that the desired testimony or document is not reasonably available from any other source, and if testimony is requested, the intended use of the testimony, a general summary of the testimony desired, and a showing that no document could be provided and used in lieu of testimony. The purpose of this requirement is to permit the Solicitor to make an informed decision as to whether testimony or production of a document should be authorized.
(d) Any Office employee who is served with a demand shall immediately notify the Office of the Solicitor.
(e) The Solicitor may consult or negotiate with an attorney for a party or the party, if not represented by an attorney, to refine or limit a demand so that compliance is less burdensome or obtain information necessary to make the determination required by paragraph (c) of this section. Failure of the attorney or party to cooperate in good faith to enable an informed determination to be made under this part may serve as the basis for a determination not to comply with the demand.
(f) A determination under this part to comply or not to comply with a demand is not an assertion or waiver of privilege, lack of relevance, technical deficiencies or any other ground for noncompliance. The Commissioner reserves the right to oppose any demand on any legal ground independent of any determination under this part.

§15a.5 *Testimony of Office employees in proceedings involving the United States.*

(a) An Office employee may not testify as an expert or opinion witness for any party other than the United States.
(b) When appropriate, the Solicitor may authorize an Office employee to give testimony as an expert or opinion witness on behalf of the United States. Expert or opinion testimony on behalf of the United States will not be authorized in any legal proceeding involving the validity or enforceability of a patent or registered trademark.
(c) Whenever, in any legal proceeding involving the United States, a request is made by an attorney representing or acting under the authority of the United States, the Solicitor will make all necessary arrangements for the Office employee to give testimony on behalf of the United States. Where appropriate, the Solicitor may require reimbursement to the Office of the expenses associated with an Office employee giving testimony on behalf of the United States.

§15a.6 *Legal proceedings between private litigants*

(a) Testimony by an Office employee and production of documents in a legal proceeding not involving the United States shall be governed by §15a.4.
(b) If an Office employee is authorized to give testimony in a legal proceeding, the testimony, if otherwise proper, shall be limited to facts within the personal knowledge of the Office employee. An Office employee is prohibited from giving expert or opinion testimony, answering hypothetical or speculative questions, or giving testimony with respect to subject matter which is privileged. If an Office employee is authorized to testify in connection with the employee's involvement or assistance in a quasi-judicial proceeding which took place before the Office, that employee is further prohibited from giving testimony in response to questions which seek:

(1) Information about that employee's:

(i) Background.
(ii) Expertise.
(iii) Qualifications to examine or otherwise consider a particular patent or trademark application.
(iv) Usual practice or whether the employee followed a procedure set out in any Office manual of practice in a particular case.
(v) Consultation with another Office employee.
(vi) Understanding of:
(A) A patented invention, an invention sought to be patented, or patent application, patent, reexamination or interference file.
(B) Prior art.

(vii) Reliance on particular facts or arguments.

(2) To inquire into the manner in and extent to which the employee considered or studied material in performing the quasi-judicial function.
(3) To inquire into the bases, reasons, mental processes, analyses, or conclusions of that Office employee in performing the quasi-judicial function.

§15a.7 *Procedures when an Office employee receives a subpoena.*

(a) Any Office employee who receives a subpoena shall immediately forward the subpoena to the Office of the Solicitor. The Solicitor will determine the extent to which an Office employee will comply with the subpoena.
(b) If the Office employee is not authorized to comply with the subpoena, the Office employee shall appear at the time and place stated in the subpoena, produce a copy of Part 15a of Title 15 and a copy of this part, and respectfully refuse to provide any testimony or produce any document. *United States ex rel. Touhy* v. *Ragen*. 340 U.S. 462 (1951).
(c) When necessary or appropriate, the Solicitor will request assistance from the Department of Justice or a U.S. Attorney or otherwise assure the presence of an attorney to represent the interests of the Office or an Office employee.

Revisions to §§1701 and 1701.01 of MPEP

§1701 Office personnel not to express opinion on validity or patentability of patent

Every patent is presumed to be valid. 35 U.S.C. §282, first sentence. Public policy demands that every employee of the Patent and Trademark Office refuse to express to any person any opinion as to the validity or invalidity of, or the patentability or unpatentability of any claim in any U.S. Patent, except to the extent necessary to carry out (a) examination of an application seeking to reissue the patent, (b) a reexamination proceeding to reexamine the patent, or (c) an interference involving the patent.

The question of validity or invalidity is otherwise exclusively a matter to be determined by a court. Members of the patent examining corps are cautioned to be especially wary of any inquiry from any person outside the Patent and Trademark Office, including an employee of another Government agency, the answer to which might indicate that a particular patent should not have issued.

When a field of search for an invention is requested, examiners should routinely inquire whether the invention has been patented in the United States. If the invention has been patented, no field of search should be suggested.

Employees of the Patent and Trademark Office, particularly patent examiners who examined an application which matured into a patent or a reissued patent or who conducted a reexamination proceeding, should not discuss or answer inquiries from any person outside the Patent and Trademark Office as to whether or not a certain reference or other particular evidence was considered during the examination or proceeding and whether or not a claim would have been allowed over that reference or other evidence had it been considered during the examination or proceeding. Likewise, employees are cautioned against answering any inquiry concerning any entry in the patent or reexamination file, including the extent of the field of search and any entry relating thereto. The record of the file of a patent or reexamination proceeding must speak for itself.

Practitioners can be of material assistance in this regard by refraining from making improper inquiries of members of the patent examining corps. Inquiries from members of the public relating to the matters discussed above must of necessity be refused and such refusal should not be considered discourteous or an expression of opinion as to validity or patentability.

37 CFR 15a.7]

It is the policy of the Patent and Trademark Office that its employees, including patent examiners, will not appear as witnesses or give testimony in legal proceedings, except under the conditions specified in 37 CFR Part 15a. Any employee who testifies contrary to this policy will be *dismissed* or *removed*. The reasons for this policy are set out in 37 CFR 15a.3.

Whenever an employee of the Patent and Trademark Office, including a patent examiner, is asked to testify or receives a subpoena, the employee shall immediately notify the Office of the Solicitor. Inquiries requesting testimony shall be also referred immediately to the Office of the Solicitor.

Patent examiners and other Patent and Trademark Office employees performing or assisting in the performance of quasi-judicial functions, are forbidden to testify as experts or to express opinions as to the validity of any patent.

Any individual desiring the testimony of an employee of the Patent and Trademark Office, including the testi-

mony of a patent examiner or other quasi-judicial employee, must comply with the provisions of 37 CFR Part 15a.

A request for testimony of an employee of the Patent and Trademark Office should be made to the Office of the Solicitor at least *ten working* days prior to the date of the expected testimony.

If an employee is authorized to testify, the employee will be limited to testifying about facts within the employee's personal knowledge. Employees are prohibited from giving expert or opinion testimony. *Fischer & Porter Co.* v. *Corning Glass Works*, 61 F.R.D. 321, 181 USPQ 329 (E.D. Pa. 1974). Likewise, employees are prohibited from answering hypothetical or speculative questions. *In re Mayewsky*, 162 USPQ 86, 89 (E.D. Va. 1969) (deposition of an examiner must be restricted to relevant matters of fact and must avoid any hypothetical or speculative questions or conclusions based thereon); *Shaffer Tool Works* v. *Joy Mfg. Co.*, 167 USPQ 170 (S.D. Tex. 1970) (deposition of examiner should be limited to matters of fact and must not go into hypothetical or speculative areas or the bases, reasons, mental processes, analyses, or conclusions of the examiner in acting upon a patent application). Employees will not be permitted to give testimony with respect to subject matter which is privileged. Several court decisions limit testimony with respect to quasi-judicial functions performed by employees. Those decisions include *United States* v. *Morgan*, 313 U.S. 409, 422 (1941) (improper to inquire into mental processes of quasi-judicial officer or to examine the manner and extent to which the officer considered an administrative record); *Western Electric Co.* v. *Piezo Technology, Inc.* v. *Quigg*, 860 F.2d 428, 8 USPQ 2d 1853 (Fed. Cir. 1988) (patent examiner may not be compelled to answer questions which probe the examiner's technical knowledge of the subject matter of a patent); *McCulloch Gas Processing Co.* v. *Department of Energy*, 650 F.2d 1216, 1229 (Temp. Emer. Ct. App. 1981) (discovery of degree of expertise of individuals performing governmental functions not permitted); *In re Nilssen*, 851 F.2d 1401, 7 USPQ 2d 1500 (Fed. Cir. 1988) (technical or scientific qualifications of examiners-in-chief are not legally relevant in appeal under 35 U.S.C. §134 since board members need not be skilled in the art to render obviousness decision); *Lange* v. *Commissioner*, 352 F. Supp. 166, 176 USPQ 162 (D.D.C. 1972) (technical qualifications of examiners-in-chief not relevant in §145 action).

In view of the discussion above, if an employee is authorized to testify in connection with the employee's involvement or assistance in a quasi-judicial proceeding which took place before the Patent and Trademark Office, the employee will not be permitted to give testimony in response to questions which seek:

(1) Information about that employee's:

(A) Background.
(B) Expertise.
(C) Qualifications to examine or otherwise consider a particular patent or trademark application.
(D) Usual practice or whether the employee followed a procedure set out in any Office manual of practice (including the MPEP or TMEP) in a particular case.
(E) Consultation with another Office employee.
(F) Understanding of:

(i) A patented invention, an invention sought to be patented, or patent application, patent, reexamination or interference file.
(ii) Prior art.
(iii) Registered subject matter, subject matter sought to be registered, or a trademark application, registration, opposition, cancellation, interference or concurrent use file.
(iv) Any Office manual of practice.
(v) Office regulations.
(vi) Patent, trademark, or other law.
(vii) The responsibilities of another Office employee.

(G) Reliance on particular facts or arguments.

(2) To inquire into the manner in and extent to which the employee considered or studied material in performing a quasi-judicial function.
(3) To inquire into the bases, reasons, mental processes, analyses, or conclusions of that Office employee in performing the quasi-judicial function.

Any request for testimony addressed or delivered to the Office of the Solicitor shall comply with 37 CFR 15a.4(c). All requests must be in *writing*. The need for a subpoena may be obviated where the request complies with 37 CFR 15a.4(c) if the party requesting the testimony further meets the following conditions:

(1) The party requesting the testimony identifies the civil action or other legal proceeding for which the testimony is being taken. The identification shall include:

(a) the style of the case,
(b) the civil action number,
(c) the district in which the civil action is pending,
(d) the judge assigned to the case, and
(e) the name, address, and telephone number of counsel for all parties in the civil action.

(2) The party agrees not to ask questions seeking information which is precluded by 37 CFR 15a.6(b).
(3) The party shall comply with applicable provisions of the Federal Rules of Civil Procedure, including Rule 30, and give ten working days notice to the Office of the Solicitor prior to the date a deposition is desired. Fifteen working days notice is required for any deposition which is desired to be taken between Nov. 15 and Jan. 15.
(4) The party agrees to notice the deposition at a place convenient to the Patent and Trademark Office. The Conference Room in the Office of the Solicitor is deemed to be a place convenient to the Office.
(5) The party agrees to supply a copy of the transcript of the deposition to the Patent and Trademark Office for its records.

Absent a written agreement meeting the conditions specified in paragraphs (1) through (5), a party must comply with the precise terms of 37 CFR 15a.4(c) and the Patent and Trademark Office will not permit a deposition without issuance of a subpoena.

Revisions to §§1801 and 1801.01 of TMEP

§1801 Office personnel not to express opinion on validity of registered trademark

A certificate of registration of a trademark on the Principal Register is prima facie evidence of the validity of the registration. 15 U.S.C. §1057(b). Public policy demands that every employee of the Patent and Trademark Office refuse to express to any person any opinion as to the validity of any registered trademark, except to the extent necessary to carry out *inter partes* proceedings at the Trademark Trial and Appeal Board in cancellation and similar proceedings authorized by law.

The question of validity of a registered trademark is otherwise exclusively a matter to be determined by a court. Members of the trademark examining operation are cautioned to be especially wary of any inquiry from any person outside the Patent and Trademark Office, including an employee of another Government agency, the answer to which might indicate that a particular registration should not have been published or issued.

Employees of the Patent and Trademark Office, particularly trademark examining attorneys who examined an application should not discuss or answer inquiries from any person outside the Patent and Trademark Office as to whether or not a certain registration or other particular evidence was considered during the examination of the application or whether a trademark would have been published or registered if the registration or other evidence had been considered during the examination. Likewise, employees are cautioned against answering any inquiry concerning any entry in the trademark registration file, including the extent of the field of search and any entry relating thereto. The record of the file of a trademark registration or *inter parties* proceedings before the Trademark Trial and Appeal Board must speak for itself.

Practitioners can be of material assistance in this regard by refraining from making improper inquiries of members of the trademark examining operation. Inquiries from members of the public relating to the matters discussed above must of necessity be refused and such refusal should not be considered discourteous or an expression of opinion as to validity of any registration.

It is the policy of the Patent and Trademark Office that its employees, including trademark examining attorneys, will not appear as witnesses or give testimony in legal proceedings, except under the conditions specified in 37 CFR Part 15a. In view of the discussion above, if an employee is authorized to testify in connection with the employee's involvement or assistance in a quasi-judicial proceeding which took place before the Patent and Trademark Office, the employee will not be permitted to give testimony in response to questions which seek:

Pursuant to 37 CFR 10.11(b), a survey letter was mailed on Nov. 18, 1988 from the Office of Enrollment and Discipline (OED) to all practitioners in patent cases whose last names begin with K through O. Enclosed with the letter was a data sheet which had to be completed and returned to OED as soon as possible. All data sheets returned to OED will be acknowledged. Failure by a practitioner to submit a completed data sheet within the time period specified in the survey letter will result in the practitioner being removed from the register in accordance with CFR 10.11(b).

If your last name begins with K through O and you have not received a data sheet or if you returned the data sheet to OED and you did not receive an acknowledgement within three (3) months after returning the data sheet to OED, please contact Patricia M. Jordan at (703) 557-1728.

SERVICE STATISTICS

- *Assignment Backlog Improvement* — The trademark assignment backlog has been reduced to an average of 26 days. Information is available to the public in the Assignment Search Room through Dec. 29, 1988. All documents from Nov. 1988 have been returned to senders. Dec. 1988 documents are in the microfilming process and should be ready to be released on Feb. 10, 1989.

  The majority of patent assignments received from mail room work have a backlog dating from Nov. 25, 1988. The majority of patent assignments which were filed with new applications have a backlog dating from Nov. 15, 1988. Dates are different because the backlog contains a mixture of mail room documents and new application documents; new application documents are received later than mail room work.

  Our goal is to have patent and trademark assignment information available for public use within 20 days of mail room receipt for work not included with an application. For patents, availability means that the assignment is recorded on the data base. For trademarks, availability means that the assignment is filed in the Assignment Search Room card file.

  Assignments received with new applications will still take longer to record since we do not generally receive these documents for at least 30 days after filing of the application and application processing has been completed.

  We continue to investigate problems and study ways to report information. We ask that any problems and/or corrections to assignment records be brought to our attention.

HELPFUL HINTS

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System), which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collec patents from either microfilm or paper collections are generallcontemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The purpose of the amendment is to prescribe a date on which the decision of the Commissioner of Patents and Trademarks in a Patent and Trademark (PTO) disciplinary proceeding becomes final agency action for purposes of judicial review, and to provide for one request for reconsideration or modification of such decision by a party.
Effective Date: Apr. 1, 1989
For Further Information Contact: Harris A. Pitlick by telephone at (703) 557-4035 or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.
Supplementary Information: Present rules do not explicitly provide for requests for reconsideration or modification of Commissioner's decisions in appeals from initial decisions of administrative law judges in PTO disciplinary proceedings. 37 CFR 10.156 presently provides that such a Commissioner's decision is a final agency action.

In a recent case, *Klein* v. *Peterson*, 6 USPQ 2d 1556 (D.D.C. 1988), a first decision of the Commissioner was withdrawn and ultimately replaced with a second decision. The respondent sought judicial review of the first decision under 35 U.S.C. 32 after its finality had already been withdrawn and then sought judicial review of the second decision. The authority of the Commissioner to, in effect, reconsider his decision in a disciplinary proceeding was challenged in the cited case. The district court held that since there was no express statutory authority proscribing the Commissioner from reconsidering the first decision, there was implicit authority to do

so consistent with long-standing precedent in the area of federal administrative law.

While *Klein* confirmed that the Commissioner has inherent authority to reconsider a decision, at least before an appeal has been noted, the PTO believes that a rule explicitly providing for a time in which requests for reconsideration may be made by a party and a date certain for when Commissioner's decisions in disciplinary proceedings become final will both promote greater certainty in this area of disciplinary proceeding practice and eliminate the possibility of multiple appeals. The final rule is not intended to preclude the Commissioner from *sua sponte* reconsidering or modifying a decision in a disciplinary proceeding at any time where conditions warrant and a respondent's due process rights are not violated, consistent with long-standing federal administrative law precedent.

A notice of proposed rulemaking was published in the *Federal Register* on Oct. 3, 1988 (53 FR 38740) and the *Official Gazette* on Oct. 25, 1988 (1095 O.G. 44). Interested parties were requested to submit written comments on or before Dec. 1, 1988. No comments were received.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The General Counsel has certified to the Chief Counsel for Advocacy, Small Business Administration that the rule change is not expected to have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) because in merely codifying the inherent right of the PTO to reconsider its decisions *sua sponte*, the rule extends the right to each party in a PTO disciplinary proceeding to seek reconsideration.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. There will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National government and the States as outlined in Executive Order 12612.

This rule change does not contain a collection of information subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

Revision of Patent and Trademark Fees

Agency: Patent and Trademark Office, Commerce
Action: Final Rule
Summary: The Patent and Trademark Office (PTO) is amending the rules of practice in patent and trademark cases, Parts 1 and 2 of Title 37, Code of Federal Regulations, to adjust patent fee amounts and to reduce certain trademark fee amounts. The Office will be extending the comment period on the proposed amendments of the rules of practice in patent cases which would clarify requirements in the filing of applications and provide for procedures for applicants to cure certain defects in the filing of applications. After comments are received, the PTO will issue a notice of final rulemaking addressing these proposals.

Establishment and adjustment of patent fees is provided for by sections 6 and 41 of Title 35, United States Code, and section 103(b) of Pub. L. 100-703. Establishment and adjustment of trademark fees is provided for by section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) and section 103(c) of Pub. L. 100-703.
Effective Date: Apr. 17, 1989.
For Further Information Contact: Frances Michalkewicz by telephone at (703) 557-1610 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.
Supplementary Information: Patent fees were set on Oct. 1, 1982, in accordance with the provisions of Title 35, United States Code (Pub. L. 97-247). Patent fees were adjusted effective Oct. 5, 1985, in accordance with the provisions of Title 35, United States Code. Trademark fees were set on Oct. 1, 1982, in accordance with the provisions of section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. section 1113) and adjusted on Oct. 1, 1986, in accordance with the provisions of that Act and Title 35. On Nov. 6, 1986, legislation modifying the way fee adjustments could be made was enacted as Pub. L. 99-607. The fee adjustment provisions of Pub. L. 99-607, sections 3(a) and 3(b) expired on Sept. 30, 1988. On Nov. 19, 1988, legislation extending section 3(a) and section 3(b) of Pub. L. 99-607 was enacted as Pub. L. 100-703. Therefore, patent and trademark fee adjustments will be guided by the provisions of Title 35, United States Code, and the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), and by Pub. L. 100-703.

The Patent and Trademark Office is amending 37 CFR 2.6 to reduce the fee for filing an application for trademark registration from $200 to $175 per class. The Office also is reducing the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application from $100 to $8 for each mark in the same document.

Effective Oct. 1, 1982, trademark operations within the Office became 100 percent user-fee funded. Experience to date has demonstrated that the fees first established in Oct. 1982, and as later adjusted in Oct. 1986, are more than adequate to meet total trademark function costs. At the end of fiscal year 1988, total trademark function fees exceeded total trademark function costs by approximately $10 million. Left undisturbed, it is projected that the current trademark fee structure will re-

sult in an additional $12.7 million in excess fees over the course of the next three-year fee cycle. Thus, by the end of fiscal year 1991, total trademark fees are projected to exceed total trademark costs by almost $23 million if the current fee structure remains in place.

In this light, the Office is proposing to reduce both the trademark application and assignment fees. Reducing the application fee to $175 would be consistent with the legislative history surrounding passage of Pub. L. 97-247. In its report (H. Rep. No. 97-542, May 17, 1982), the House Committee on the Judiciary stated that, "It is expected that the Commissioner will set the [trademark] fees in a way that the filing fee will be kept as low as possible to foster use of the Federal registration system." The application filing fee from Oct. 1982 to Oct. 1986 was $175. The filing fee was increased in 1986 to $200 in an effort to recover a greater percentage of the actual costs incurred in the processing of trademark applications. While the reduction will increase the discrepancy between the application filing fee and our projected unit cost, the size of the current "surplus," as well as the objective of encouraging filings, supports the action.

Reducing the fee for recording trademark assignments to $8 for each mark makes such fees consistent with those for the recording of patent assignments.

While the fee reductions still will leave a healthy "surplus," prudence suggests that further reductions be held in abeyance pending implementation of "The Trademark Law Revision Act of 1988" (Pub. L. 100-667). The Act, among other things, permits applicants to file applications for Federal trademark registrations based upon a bona fide "intent-to-use" the mark in commerce. Implementation of "intent-to-use" legislation will require the Office to incur additional expenditures, such as increased personnel costs and improved computer capabilities. The Office will review its trademark fee structure approximately 18 months from implementation and propose further fee adjustments if warranted but will not propose to adjust the application and assignment fees.

Even absent "intent-to-use," the Office will probably be required to upgrade its computer capabilities within the near future. Moreover, implementation of an automated trademark assignment system, now scheduled for fiscal year 1990, and other improvements in automated searching, will result in increased demands on trademark resources.

BACKGROUND:

Provisions of Title 35 and Title 15, United States Code, and Pub. L. 100-703 Which Affect This Notice of Final Rulemaking

Patent and Trademark Office fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. Section 41(a) of Title 35, United States Code, establishes a number of statutory fees. Among the more significant of these are fees for filing a patent application and issuing a patent. Certain other fees, such as appeal fees, the fee for filing a disclaimer, fees for filing petitions seeking to revive an abandoned application and for extensions of time also are set in 35 U.S.C. 41(a). Section 41(b) of Title 35, United States Code, sets forth the statutory fees for maintaining a patent in force if the application was filed on or after Aug. 27, 1982.

The provisions of Pub. L. 96-517 also establish maintenance fees for patents other than design and plant patents issued on applications filed on or after Dec. 12, 1980 and before Aug. 27, 1982. These maintenance fees are to recover 25 percent of the estimated cost to the Office of processing patent applications.

Section 1 of Pub. L. 97-247 authorized the reduction by 50 percent in the fees paid under 35 U.S.C. 41(a) and 35 U.S.C. 41(b) by independent inventors, small business concerns, and nonprofit organizations, who meet the definitions established. Section 1(a)(2) of Pub. L. 99-607 makes this provision permanent in 35 U.S.C. 41(h).

Section 41(f) of Title 35, United States Code, provides that fees established in 35 U.S.C. 41(a) and 35 U.S.C. 41(b), "may be adjusted by the Commissioner on Oct. 1, 1985, and every third year thereafter, to reflect any fluctuations occurring during the previous three years in the Consumer Price Index, as determined by the Secretary of Labor." Section 41(f) also provides that changes of less than one percent may be ignored. Pub. L. 100-703 makes no modifications to 35 U.S.C. 41(f).

Section 41(d) of Title 35, United States Code, provides that the "Commissioner will establish fees for all other processing, services, or materials related to patents" which are not covered in 35 U.S.C. 41(a) and 35 U.S.C. 41(b), "to recover the estimated average cost to the Office of such processing, services or materials."

Section 103(b) of Pub. L. 100-703 changes the way fees established under 35 U.S.C. 41(d) can be adjusted. For fiscal years 1989, 1990, and 1991, the Commissioner cannot increase fees established under 41(d) except for the purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous three years in the Consumer Price Index.

Section 103(b) of Pub. L. 100-703 provides that the Commissioner cannot establish additional fees under 35 U.S.C. 41(d) during fiscal years 1989, 1990, and 1991.

Section 376 of Title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty. The fees under the Patent Cooperation Treaty are keyed to full cost recovery of the processing costs under the Treaty. Pub. L. 100-703 makes no modifications to 35 U.S.C. 376.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) authorizes the Commissioner to establish fees for the filling and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks. No fee for the filing or processing of an application for the registration of a trademark or other mark or for the renewal or assignment of a trademark or other mark will be adjusted more than once every three years. The House Committee on the Judiciary, in a report that accompanied H.R. 6260, which ultimately was enacted as Pub. L. 97-247, recommended a trademark fee schedule to the Commissioner which was established by a rule published in the *Federal Register* on July 30, 1982 at 47 FR 33086, effective Oct. 1, 1982.

A final rule to increase the trademark application filing fee per class and the fee for copies of trademarks was published in the *Federal Register* on Aug. 4, 1986 at 51 FR 28052. The increased fees became effective on Oct. 1, 1986.

Section 103(a) of Pub. L. 100-703 changes the way fees established under the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) can be adjusted. For fiscal years 1989, 1990 and 1991, the Commissioner cannot increase fees established under the Act except for the purposes of making adjustments which in the aggregate do not exceed fluctuations during the previous three years in the Consumer Price Index.

Section 103(a) of Pub. L. 100-703 provides that the Commissioner cannot establish additional fees under the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113) during fiscal years 1989, 1990, and 1991.

However, as described above, the Office is only reducing the fee for filing an application, per class, and the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application.

Final Rule Changes

General Procedures

Cost Calculations: The Office calculated unit costs for all fees based on OMB Circular A-25, "User Fees," and OMB Circular A-130, "Management of Federal Information Resources." Costs were determined from the best available records (for example, the 1987 end of fiscal year financial statements for the Office) and included direct and indirect costs to the Office of carrying out the activity, as directed by OMB Circular A-25. To estimate costs for the three-year fee cycle Apr. 1989-Mar. 1992, the 1987 actual costs were adjusted by the inflation rates from Oct. 1988 through Mar. 1989, and then by a mid-cycle inflation rate for the period Apr. 1989-Mar. 1992. The total inflation rate was 12.644 percent derived from the Administration's inflation projection.

Workload Projections

Determination of future year workloads varies by fee code. Principal workload projection techniques are as follows:

> Patent and trademark application workloads were projected from statistical regression models using recent application trends. Associated application workloads, for example, patent claims and extensions of time, grow relative to patent applications. Patent issues are projected from an in-house patent productivity model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 80 percent, 50 percent and 25 percent, respectively. Trademark affidavits and renewals are based on prior year registrations and renewal trends. Service fee workloads follow linear trends from prior year activities. All workload estimates are approved by the manager responsible for the fee program.

Policy for applying the Consumer Price Index: The Office of Management and Budget has determined that the Patent and Trademark Office should use Consumer Price Index-U (CPI) to adjust patent fees. The Department of Labor's Consumer Price Index is made public approximately twenty-one days after the end of the month being calculated. The time lag between the initiation and the completion of the rulemaking process dictates that the Dec. 1988 through Mar. 1989 inflation rate be projected. The Administration's projected cumulative CPI for the three-year period Apr. 1986-Mar. 1989 is 10.311 percent.

The fee amounts being adopted by this rule package were adjusted by the CPI that was projected in 1988, i.e., 10.303 percent. Since this is less than the amount the Office has determined to be the actual projected rate and that applying the updated projection of 10.311 percent would have a negligible effect on the fee amounts, no changes have been made.

Rounding Procedures: After application of the 10.303 percent projected fluctuation in the CPI to fees, amounts were rounded by applying standard arithmetical rules so that the amounts rounded would be de minimis and convenient to the user. Fees of $100 or more were rounded to the nearest $10. Fees between $10 and $99 were rounded to the nearest even number so that the comparable small entity fee would be a whole number. Fees under $2 were rounded for convenience.

Since the amounts of the patent fees that went into effect on Oct. 5, 1985 were rounded after application of the Consumer Price Index, a first step in calculating new fee amounts was to eliminate any effects of rounding prior years' fee adjustments. For example, 35 U.S.C. 41(a), sets the patent application filing fee at $300.00. Applying the 11.8 percent CPI for the period 1983-1985 resulted in an allowable increase to $335.40. This amount was rounded to $340.00. For purposes of this fee adjustment process, the base used to adjust fees for the next fee cycle was the "unrounded" fee amount; i.e., the $335.40 for patent application filing fees. Similarly, the cost for certifying Office records was $2.70. This amount was rounded to $3.00. For the purposes of this fee adjustment process, the base was unrounded amount of $2.70.

It should be noted that following routine rounding off practices can result in some fee items being adjusted by more or less than CPI. This divergence from the CPI ceiling will only exist in the short term because of the policy of applying the CPI adjustment factor to the unrounded amount from the previous fee cycle.

Proposed Rule Changes Under Title 35 and Title 15, United States Code and Pub. L. 100-703

Statutory patent fees established under 35 U.S.C. 41(a) and 35 U.S.C. 41(b) are adjusted in accordance with 35 U.S.C. 41(f) to reflect any fluctuations occurring during the previous three years in the CPI.

Non-statutory patent fees established under 35 U.S.C. 41(d) are adjusted in accordance with section 103(b) of Pub. L. 100-703 to reflect, in the aggregate, any fluctuations occurring during the previous three years (Apr. 1986-Mar. 1989) in the Consumer Price Index, as determined by the Secretary of Labor.

Fees established under 35 U.S.C. 376 are adjusted to recover the full cost of processing under the Patent Cooperation Treaty. International patent fees under 37 CFR 1.492 are related to patent fees established under 35 U.S.C. 41(a) and are adjusted to reflect fluctuations in the CPI.

For fees established under section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), the Office is reducing the fee for filing an application, per class, and the fee for recording trademark assignments and agreements or other papers relating to the property in a registration or application as fully described above.

Fee Adjustment Methodology

1. PROJECTED ACTUAL COSTS. The projected actual costs for all fee items were calculated by applying the principles of OMB Circulars A-25 and A-130.

a. Statutory patent fees were derived by: (1) identifying those operational units of the Office involved in, or contributing to, the processing of a patent application through all phases of examination; (2) identifying and certifying actual fiscal year 1987 obligations incurred by the operational units in processing an application; (3) projecting those obligations to the period of Apr. 1989 through Mar. 1992 in accordance with approved budgets and future year budget targets; and (4) increasing the obligations projected for the period of Apr. 1989 through Mar. 1992 by the Administration's estimates for federal pay raise adjustments and projected inflation. Projected actual costs for Apr. 1989-Mar. 1992, $729,810,051 less projected budget authority of $265,834,000, are $463,976,051.

b. For non-statutory patent fees, projected costs for each fee item were established by (1) identifying actual costs for 1987, and (2) projecting actual costs for fiscal years 1988 through Mar. 1992 by applying the Administration's inflation projection of 12.644 percent. This projected actual cost was then multiplied by the projected workload for each fee item. The sum of the projected costs for all fee items is the projected actual cost of operation during the three-year fee cycle. Projected actual costs for Apr. 1989-Mar. 1992 are $64,661,341.

c. The same methodologies as described in paragraphs (a) and (b) above were applied to Patent Cooperation Treaty fees. Projected actual costs for Apr. 1989-Mar. 1992 are $16,531,990.

d. The same methodology as described in paragraph (b) above was applied to Trademark fees. Projected actual costs for Apr. 1989-Mar. 1992 are calculated to be $74,329,783.

2. INCOME PROJECTIONS

a. The maximum amount of statutory fee income that the Office is authorized to recover under 35 U.S.C. 41(f) was calculated as follows.

For each statutory patent fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all statutory patent fees is the maximum amount that the Office is authorized by 35 U.S.C. 41(f) to recover during the fee cycle and is equal to $464,676,178.

b. The maximum amount of non-statutory fee income that the Office is authorized to recover under §103(b) of Pub. L. 100-703 was calculated as follows.

For each non-statutory patent fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all non-statutory patent fees is the maximum amount that the Office is authorized by section 103(b) of Pub. L. 100-703 to recover during the fee cycle and is equal to $62,101,874.

c. For Patent Cooperation Treaty fees, the Office is authorized by 35 U.S.C. 376 to recover the full cost of processing under the Treaty. Thus, the projected costs identified in paragraph 1(c) for Patent Cooperation Treaty fees of $16,531,990 would be the maximum level of recovery.

d. The maximum amount of trademark fee income that the Office is authorized to recover under section 103(a) of Pub. L. 100-703 was calculated as follows.

For each trademark fee, the unrounded base (i.e., the 1986 adjusted fee before rounding) was multiplied by the projected CPI fluctuation of 10.303 percent for the three-year period Apr. 1986-Mar. 1989. This amount was then multiplied by the projected workload for Apr. 1989-Mar. 1992 to project the income from that fee item during the Apr. 1989-Mar. 1992 fee cycle. The sum of the projected incomes from all trademark fees is the maximum amount that the Office is authorized by section 103(a) of Pub. L. 100-703 to recover during the fee cycle and is equal to $107,704,135.

e. Each statutory patent fee amount identified in paragraph 2(a), and each PCT amount identified in paragraph 2(c) above was rounded according to the de minimis rounding rules described above.

Sections 103(a) and 103(b) of Pub. L. 100-703 allow the Office to set fees "in the aggregate." The fee amounts proposed for non-statutory patent fees and trademark fees will recover the maximum amount of income determined in paragraph (b) and (d) above.

Each of these fee amounts was multiplied by the projected workload during the fee cycle to project the income from that fee item. The sum of the projected income from all patent fees is $542,281,082, which is the sum of the projected incomes from statutory patent fees, $463,626,421, non-statutory patent fees, $62,047,763, and Patent Cooperation Treaty fees, $16,606,898.

f. The Office reduced two trademark fees, as described above. Each trademark fee amount was multiplied by the projected workload during the fee cycle to project the income from that fee item. The sum of the projected income from all trademark fees is projected to be $72,972,690.

Summary:

Fee Category	Projected Cost April 1989-Mar 1992	Maximum Allowable Recovery	Projected Income April 1989 - Mar 1992
Statutory Patent	$463,976,051	$464,676,178	$463,626,421
Non-Statutory Patent	$64,661,341	$62,101,874	$62,047,763
PCT	$16,531,990	$16,531,990	$16,606,898
Total - Patent	$545,169,382	$543,310,042	$542,281,082
Total - Trademarks	$74,329,783	$107,704,135	$72,972,690
Total - All Fees	$619,499,165	$651,014,177	$615,253,772

The unit costs by fee item are summarized in Appendix A. The Office has detailed cost calculation worksheets for each fee item, which are available for public inspection in Suite 904 of Bldg. 2, Crystal Park at 2121 Crystal Dr., Arlington, Va.

It is intended that the amount of any fee due and payable on or after Apr. 17, 1989 is the amount set in this rulemaking. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the Office. A "Certificate of Mailing under Section 1.8" is not "proper" for items which are specifically excluded from the provisions of §1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing is not "proper" Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. The provisions of 37 CFR 1.10, relating to filing of papers and fees by "Express Mail" with certificate, however, do apply to any paper or fee (including patent and trademark applications) to be filed in the Office. If an application or fee is filed by "Express Mail" with a certificate of express mailing dated on and after the effective date of the rules, the amount of the fee to be paid is the fee established herein if a change is being made in the fee. In order to ensure clarity in the implementation of the fee proposals, a discussion of specific sections is set forth below.

The access devices, encoding equipment, and magnetic cards comprise an equipment access system called the CopiShare system. The magnetic CopiShare Cards are purchased by the public and encoded with an amount of funds paid to the Office. The customer places the encoded card in the device connected to the photocopier or reader/printer, and a pre-set amount is deducted for each copy produced.

The Office is planning to authorize the public to use credit cards for the purchase of CopiShare Cards. This will be a pilot program for accepting credit cards for fees, and if feasible, may be extended to other operations of the Office.

RESPONSE TO COMMENTS ON THE RULES

A notice of proposed rulemaking to adjust patent and trademark fees was published in the *Federal Register* on Nov. 30, 1988, at 53 FR 48402. Corrections of typographical errors were published in the *Federal Register* on Dec. 8, 1988, at 53 FR 49637. A notice also was published on Dec. 13, 1988 at volume 1097 of the *Official Gazette* of the United States Patent and Trademark Office, pages 16 through 29. A public hearing was conducted on Jan. 4, 1989. Six letters submitting written comments were received and oral testimony was presented by one person at the public hearing. All of the written and oral comments were considered in adopting the changes set forth herein. The comments submitted, along with responses, appear below.

Comment:

A major patent law association requested an additional sixty (60) days to comment on proposed changes to the following rules that go beyond fees. Several other respondents also commented on the proposed changes to these rules.

37 CFR 1.53 Serial number, filing date, and completion of application.

37 CFR 1.55 Claim for foreign priority.

37 CFR 1.60 Continuation or divisional application for invention disclosed in a prior application.

37 CFR 1.62 File wrapper continuing procedure.

37 CFR 1.96 Submission of computer program listings.

Response:

The Office is not amending 37 CFR 1.53, 1.60, 1.62 and 1.96 and is extending the comment period until Mar. 3, 1989. The Office also is not adding new rule 37 CFR 1.21(n) which refers to 37 CFR 1.53, 1.60 and 1.62. The Office is amending only that portion of 37 CFR 1.55 which clarifies that the already established fee refers to the amount in the new 37 CFR 1.17(i)(1) and not the old §1.17(i). After the extended comment period closes, the Office will issue a new notice of final rulemaking addressing these proposals.

Comment:

Two repondents requested that the Office provide for a comment period longer than the 30 days accorded in this rule package.

Response:

Office policy is to provide a 60 day comment period whenever possible. For fee-related rules, the comment period generally is limited to 30 days because the final rule must be in place 60 days before the fees are effective. This gives the public at least 90 days notice of a fee change.

In addition, the Office alerts, as far in advance as possible, major patent and trademark associations and organizations, and its advisory committees, that it will be proposing a fee adjustment. Finally, copies of the Nov. 30, 1988, *Federal Register* notice were mailed to 140 organizations, associations and the advisory committees only days after their publication in the *Federal Register*.

Comment:

One respondent asked whether maintenance fees that are paid after the effective date of the fee increase are payable in the increased amount or the amount that was payable when due.

Response:

The amount of any fee payment made on or after the effective date of this rule package is the amount set in the rulemaking.

Comment:

Two respondents, representing major trademark organizations, opposed the proposed reductions to the trademark application and assignment fees. The following major points were made: (1) No reductions should be made until Nov. 1989, when Pub. L. 100-667 (The Trademark Law Revision Act of 1988) is implemented; (2) Leading accounting firms recommend that a one year's operating reserve would be prudent; (3) It was Congressional intent that revenue generated from a $100 assignment fee be used to subsidize the trademark operation.

The respondents also questioned whether the PTO could make more than one adjustment every three years under the present authorization statute, even when such adjustments would result in a reduction of certain fee amounts.

Response:

After careful consideration of the comments received, the PTO has decided to implement the two fee reductions for the following reasons: (1) Careful analysis has confirmed that projected revenues will be sufficient to implement the Intent-to-Use legislation (Pub. L. 100-667) and still maintain an operating reserve within PTO's two percent fee policy. We believe it will take about 18 months experience with intent-to-use to be able to propose other changes to trademark fee amounts, and thus a delay in implementation of the proposed fee reductions to Nov. 1989 would not accomplish any useful purpose. (2) A one-year operating reserve for trademark programs is far too large an amount to address unforeseen expenses, would unfairly penalize users, is politically imprudent, especially given the current Federal deficit, and could be construed to constitute an unfair tax on the general user. (3) In the past, PTO has been critized for charging $100 for a trademark assignment and $7.00 for a patent assignment. For example, refer to public comments on the 1986 trademark fee adjustments published in the *Federal Register* on Aug. 4, 1986 at 51 FR 28055. While it is true that the trademark assignment fee was originally designed to help subsidize the trademark application fee, which is set at a level that does not recover actual costs, the PTO believes that the proposed reduction in the assignment fee will not result in subsequent increases in the application fee or jeopardize the financial health of trademark operations. Further, the Office wants to assure respondents that in proposing a reduction in the assignment fee, the costs of cleaning up the trademark assignment data base have been taken into account.

As noted above, the planning of fee adjustments has been such that we do not anticipate two adjustments within a fee cycle. The legislative history to Public Law 99-607 indicates that Congress intended the PTO to reduce fees whenever appropriate.

Comment:

One respondent, a representative of a major patent organization, raised the following points (1) The PTO should conduct an analysis of the impact of patent fees on independent inventors and small businesses; (2) the reduction of fees for individual inventors and small business should continue to be subsidized by taxpayer revenues; (3) the PTO should make every effort to increase its efficiency as a way of holding down the level of fees; (4) the PTO and the Administration should attempt to amend the Gramm-Rudman-Hollings Act as it relates to user fees; and (5) the Office should allow 90 days for the public to comment on proposed rules.

Response:

(1) The PTO continually has monitored the level of filings by small businesses and individual inventors, which has averaged 34 percent for the years 1986-1988. The Office will conduct a study to assess the impact of patent fees on individual inventors and small businesses.

(2) For the 1989-91 fee cycle, the reduction of patent fees individual inventors and small businesses will continue to be subsidzed by taxpayer revenues. As the PTO continues to progress to total financing by user fees, two options will be explored: (a) to continue to seek general taxpayer revenue for the subsidy to domestic and foreign users alike; or (b) to establish a two tier fee system for patent statutory fees. While the first option could means lower overall patent fees, a taxpayer subsidy would be dependent upon Congressional action. If Congress were not to appropriate the necessary funds, the subsidy would not be available, in whole or in part. Full reliance on user fees could provide the PTO with additional flexibilities to meet user needs, especially in responding to growing workloads as the workloads occur.

(3) The PTO continues to scrutinize its operating budgets to identify ways to increase efficiency, to constrain costs, and to continue to provide better services to its users. The current fee package permits patent and patent service fees to be raised only with inflation. Trademark fees are held steady or are reduced. Despite these limited adjustments, user fees in 1989-1991 will allow the PTO to continue to pursue its major goals to improve the quality and timeliness of its goods and services.

(4) The Gramm-Rudman-Hollings sequestration of 1986 did affect PTO user fees. However, the Administration's budgets for 1987, 1988 and 1989 met all deficit reduction targets and did not require automatic sequestrations. We are confident that the Administration will continue to meet all deficit reduction targets prescribed by law and thus will continue to avoid the automatic sequestrations. The PTO is supportive of all efforts to reduce the Federal deficit.

(5) This issue was addressed above.

OTHER CONSIDERATIONS: The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. There are no information collection requirements relating to patent fee rules.

The Office has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The principal impact of the major patent fees has already been taken into account in Pub. L. 99-607, which provided small entities with a 50 percent reduction in the major patent fees. The rule change adjust fees to reflect the change in the CPI and cost of processing services as provided by statute (35 U.S.C. 41(d) and 41(f)).

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal,

state, or local government agencies, or geographic regions, because most major fees are being adjusted to reflect changes in the CPI over the past three years. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System), which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collec patents from either microfilm or paper collections are generallcontemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
